

Product License Guide

This document (“**Product License Guide**”)¹ sets forth the license or right to use acquired by Customer pursuant to and subject to the terms of the ForeScout Technologies, Inc. (“**ForeScout**”) End User License Agreement (“**EULA**”) available at www.forescout.com/eula (“**Agreement**”). Capitalized terms used but not defined herein shall have the meaning set forth in the Agreement.

1. DEFINITIONS.

“**Bundle Offering**” means a ForeScout solution offering containing a defined combination of the ForeScout Products and Services, which may include Software, Cloud Services and/or Support Services.

“**Customer Environment**” means the Customer’s on-premise, hosted, network, and cloud information technology infrastructure and/or assets.

“**Data Source**” means any Customer-designated source, including third-party products and services that generates Customer Data. Data Sources may include security and non-security related data, e.g., Firewall, IPS/IDS, SIEM, applications, databases, Microsoft Office 365, Microsoft Active Directory, AWS CloudTrail, Google Cloud Platform Audit, Azure Monitor/Activity Cloud, DNS, web proxy, VPN, DHCP.

“**Endpoint**” means any physical or virtual IP-addressable device, such as, a computer, server, laptop, desktop computer, tablet, mobile phone, network switch, network router, PLC, container or virtual machine image which connects to the Customer Environment directly or through specific gateways.

“**Endpoint Count**” means the maximum number of Endpoints to be monitored by the Product, as specified in the Entitlement.

“**Enriched Logs**” means a log that is indexed in ForeScout Cloud after an observable occurrence in a Data Source that occurred at some point in time and can be security related, non-security related, or a system event; “Enriched Logs” may also be referred to as an “**Event**” or “**Alert**”.

“**ForeScout Platform**” means the collection of Products, Services, and integrations across on-premises, cloud and hybrid deployments.

“**Flat Fee**” means a single fixed fee per Customer Environment.

“**Flexible Deployment Fee**” means the fee required for Customer to receive ForeScout Support Services when Customer elects not to deploy the ForeScout Software on a ForeScout branded Appliance.

“**Integration Module**” means a module that enables a third-party product, application or tool to interface with the ForeScout Products.

“**Support Services**” or “**Premium Support**” means the ForeScout technical support Services, as further described in ForeScout’s [Support Services Policy](#).

“**Subscription**” means a right to use the Products or Services, for the duration of the Term.

“**Term-Based License**” or “**TBL**” means a license to use Software for the duration of the Term which includes Support Services.

“**Unit**” means a single quantity regarded as a whole.

¹ The End of Sale (EOS) notice for ForeScout’s Basic and Advanced Support Services and related Product and Services SKUs (“**Support Services EOS**”) can be found here: [Support Services EOS](#). ForeScout’s previous Support Services-Maintenance and Support Policy can be found here: [Support Services-Maintenance and Support Policy](#). ForeScout’s previous Product License Guide can be found here: [Product License Guide](#). Any exceptions to ForeScout’s Support Services EOS are at ForeScout’s sole discretion.

2. FORESCOUT PLATFORM LICENSING

The ForeScout Products, including the Bundle Offerings, are licensed per 1,000 Endpoints as either a Term-Based License to use the Software or as a Subscription to use the Cloud Services. An Endpoint is counted against the Endpoint Count of an Entitlement when it is known to the ForeScout Platform by either its MAC address or IP address, whether on site, off site, as detected by ForeScout Products via third-party integrations, or when it is included in the scope of a policy that contains properties or actions provided by third-party integrations.

2.1. Deployment Methods

ForeScout offers two deployment methods for the ForeScout Software—(i) physical deployment on a ForeScout branded Appliance or, (ii) flexible deployment as virtual appliances, docker container-based sensors, or on approved third-party hardware, as set forth in the Documentation. Additional fees will apply for Customers who elect the flexible deployment method.

2.2. Subscoping

Subscoping allows for the purchase of Endpoints to cover a portion, rather than all, of Customer’s Endpoints in the Customer Environment. Subscoping is not available for Bundle Offerings, Support Services, Product-Related Services, ForeScout Threat Detection & Response, or ForeScout Risk & Exposure Management. In the event ForeScout, in its sole discretion, permits subscoping, Customer may only use the functionality of the Software up to the Endpoint Count as specified in the accepted Order.

3. BUNDLE OFFERINGS

The ForeScout Bundle Offerings are a tailored collection of ForeScout Software, Integration Modules, Cloud Services and Premium Support Services to deliver solutions with comprehensive capabilities to solve a wide range of Customer problems. Bundle Offerings are licensed as either a Term-Based License or as a Subscription and include the flexible deployment method at no additional fee. In the event Customer wishes to enhance their current Bundle Offering (“**Current Bundle Offering**”) by purchasing a Bundle Offering with additional capabilities (“**Enhanced Bundle Offering**”) ForeScout will credit Customer or Customer’s ForeScout Partner, as applicable, for any unused portion of the prepaid fee for Customer’s Current Bundle Offering (“**Bundle Offering Credit**”). The Bundle Offering Credit will be calculated from the Delivery Date of the Enhanced Bundle Offering to the last date of the applicable term for the Current Bundle Offering, and will be applied towards the purchase of the Enhanced Bundle Offering.

3.1. ForeScout Network Security Core

ForeScout Network Security Core is a Bundle Offering consisting of Software and Premium Support Services. Network Security Core provides (i) discovery, classification and assessment of assets; (ii) enforcement of policy-driven network access based on user, device, and posture; (iii) recovery solutions that support the availability of ForeScout platform services to minimize downtime in cases of system failure; (iv) access to the community-built and shared Integration Modules; and (v) access to one ForeScout-built and supported Integration Module.

SKU(s)	License/ Use Right	Meter
FS-NETSEC-CORE-1000-1Y-TBL	Term-Based License	Endpoint

3.2. ForeScout OT Security Core

ForeScout OT Security Core is a Bundle Offering consisting of Software and Premium Support Services. OT Security Core provides (i) complete asset inventory and threat management for all OT/ICS assets through passive deep packet inspection of IT/IoMT/IoT/OT protocols; (ii) optional active querying of OT/IoT devices and switches; (iii) identifies misconfigurations and state changes that could interrupt business operations; (iv) quantifies the cyber security and business operations risk for every asset; (v) allows Customer to understand their compliance state with OT/ICS specific asset intelligence; (vi) visualizes and tracks network configuration and communication flows; and (vii) detects anomalies and threats before they impact business operations.

SKU(s)	License/ Use Right	Meter
FS-OTSEC-CORE-1000-1Y-TBL	Term-Based License	Endpoint

3.3. ForeScout Network Security Automation & Control

ForeScout Network Security Automation & Control is a Bundle Offering consisting of Software and Premium Support Services. Network Security Automation & Control provides (i) discovery, classification and assessment of assets; (ii) enforcement of policy-driven network access based on user, device, and posture; (iii) recovery solutions that support the availability of ForeScout platform services to minimize downtime in cases of system failure; (iv) access to the community-built and shared Integration Modules; and (v) access to all ForeScout-built and supported Integration Modules.

3.5. ForeScout Cyber Risk & Compliance

ForeScout Cyber Risk & Compliance is a Bundle Offering consisting of Software, Cloud Services and Premium Support Services. Cyber Risk & Compliance provides (i) discovery, classification and assessment of assets; (ii) enforcement of policy-driven network access based on user, device, and posture; (iii) recovery solutions that support the availability of ForeScout platform services to minimize downtime in cases of system failure; (iv) access to the community-built and shared Integration Modules; (v) access to one ForeScout-built and supported Integration Module; and (vi) cloud delivered visibility to cyber assets to continuously assess and quantify the attack surface presented by these endpoints, mitigating risk and compliance exposure through prioritized remediations and automated enforcement. ForeScout Cyber Risk & Compliance supports flexible data collection options including, but not limited to, passive sensor, active probe, and API.

4. CLOUD SERVICES

4.1. ForeScout Threat Detection & Response (“TDR”)

ForeScout TDR is a Cloud Service with Premium Support Services that ingests Enriched Logs and correlates threat signals across the Customer Environment to generate high-fidelity, high-confidence detections for analyst investigation. It can be used standalone, or combined with other ForeScout Products. After an Enriched Log is ingested it is immediately searchable for the number of days as specified by each SKU (“**Immediate Search Term**”). After the Immediate Search Term, Enriched Logs are archived and can be searched for the number of days as specified by each SKU following a restore from the archive (“**Archive Search Term**”).

ForeScout TDR includes a maximum allowed aggregate average of 0.6 Events per Second (“**EPS**”) per Endpoint per calendar month (“**Aggregate EPS Cap**”). If a Customer’s monthly aggregate average EPS per Endpoint exceeds the Aggregate EPS Cap for 3 consecutive months, ForeScout reserves the right to invoice for the Overage, pursuant to the terms of the Agreement.

5. PRODUCT-RELATED SERVICES

5.1. ForeScout Assist for TDR

ForeScout Assist is a Product-Related Service for TDR that provides 24/7 cyber security monitoring and human-led threat hunting delivered remotely by ForeScout certified security experts. An Entitlement for the ForeScout TDR Cloud Service is required for the ForeScout Assist for TDR Product-Related Service.

6. SUPPORT SERVICES

6.1. Hardware Support Services

ForeScout Hardware Support Services is a Premium Support Service sold per 1 Unit as a Subscription that provides technical support assistance and Fixes (including RMA services) for Defective Hardware. Hardware Support Services are available for purchase for the Support Period for the Hardware. If the Hardware has reached its end of Support Period as described in ForeScout’s then-current End of Life Policy and Customer has purchased, and ForeScout has agreed to provide, a Special Support Period Customer must purchase FS-EOL-HW-1-1Y-SUB for the Hardware with a Special Support Period in order to receive RMA services.

6.2. Gold Support Services

ForeScout Gold Support Services add-on is an Enhanced Support Service sold as a Flat Fee Subscription. Delivery of Gold Support Services is subject to Customer maintaining current Support Services for all Products.

SKU(s)	License/ Use Right	Meter
FS-GOLD-FF-1Y-SUB	Subscription	Flat Fee

6.3. Diamond Support Services

ForeScout Diamond Support Services add-on is an Enhanced Support Service sold as a Flat Fee Subscription. Delivery of Diamond Support Services is subject to Customer maintaining current Support Services for all Products.

SKU(s)	License/ Use Right	Meter
FS-DIAMOND-FF-1Y-SUB	Subscription	Flat Fee

6.4. Adoption Support Services

ForeScout Adoption Support Services add-on is an Enhanced Support Service that can be sold as a Flat Fee or per 1,000 Endpoints. Adoption Support Services sold as a Flat Fee are for Customer Environments with 50,000 Endpoints or less. Enterprise Adoption Support Services sold per 1,000 Endpoints are for Customer Environments with more than 50,000 Endpoints. All Adoption Support Services are sold as a Subscription. The Term for new Adoption Support Services will start fifteen (15) days from the date ForeScout processes the Order. The Term for renewals of Adoption Support Services will start the day following the expiration of a current Adoption Support Service.

Each Adoption Support Service SKU is specific to Customer's use cases and Products purchased and must align with Customer's purchased ForeScout Bundle Offering.
