Forescout 6100 Series

Overview

The Forescout 6100 series hardware appliances are designed to meet the continued increase in interconnected network environments and assets, helping businesses stay competitive and secure. These appliances offer innovations that improve performance and efficiency.

- Higher processing power, RAM, and storage
- Non-volatile Memory Express (NVMe)
- Optimizes energy usage and operational costs
- Increase endpoint density to reduce rack space requirements

These new appliances host the Forescout Platform and solutions, driving the next generation of sophisticated network security solutions for IT infrastructure and smart IOT/OT solutions and medical devices.
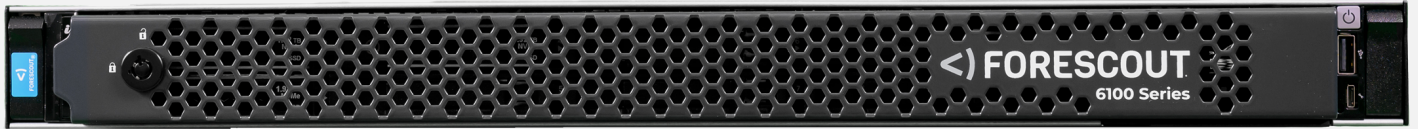

Customer Environments

The Forescout 6100 series of appliances ships with Forescout for Network Security eyeSight 9.x or with eyeInspect Sensors 5.5. Customers refreshing or expanding their Forescout 5100 series hardware environments with 6100 series appliances must first upgrade their deployment to Forescout eyeSight 9.x.
