

# Gain an organization-wide baseline of your threat landscape and risk exposure

## Threat Hunting and Risk Identification Service

### Complimentary

Achieve an understanding of threats and vulnerabilities across all networks and device types – at no cost.

### Rapid

Receive your custom report for review with Forescout security engineers in one to three days.

### Actionable

Uncover specific areas of risk that should be mitigated and remediated as soon as possible.

**Forescout Frontline** is a team of highly trained expert cybersecurity analysts and specialty services that proactively identify risk. Delivered by Frontline analysts, the Threat Hunting and Risk Identification Service overcomes staffing and visibility challenges to uncover threats and identify risk that may be lurking in your environment. Forescout Frontline will help you:

- ▶ Discover, validate and prioritize a wide range of cyber threats and vulnerabilities across your IT, IoT, IoMT and OT environments
- ▶ Analyze the context and risk associated with all findings
- ▶ Leverage the comprehensive insight to develop effective risk mitigation and remediation strategies

### Reveal

Leverage Forescout security analysts to hunt for threats, identify risks and compile data from multiple sources within a few days.

### Report

Receive a comprehensive report detailing validated threats, impacted devices and associated risks.

### Review

Discuss and prioritize mitigation and remediation alternatives so you can create an effective, prioritized risk reduction plan.

## Forescout Frontline Hunts For Threats and Risk Such As:

- ▶ Log4j
- ▶ Vulnerabilities, IOCs and CVEs, including those identified by Vedere Labs
- ▶ Blacklisted communications
- ▶ Unauthorized device communications to the internet
- ▶ Communications to known malicious IPs
- ▶ Blacklisted or default credential use
- ▶ Bots
- ▶ Worms
- ▶ Bad cyber hygiene
- ▶ Misconfigurations
- ▶ Malformed packets and enablement
- ▶ Health Check and Maturity Report

## Engagement Overview

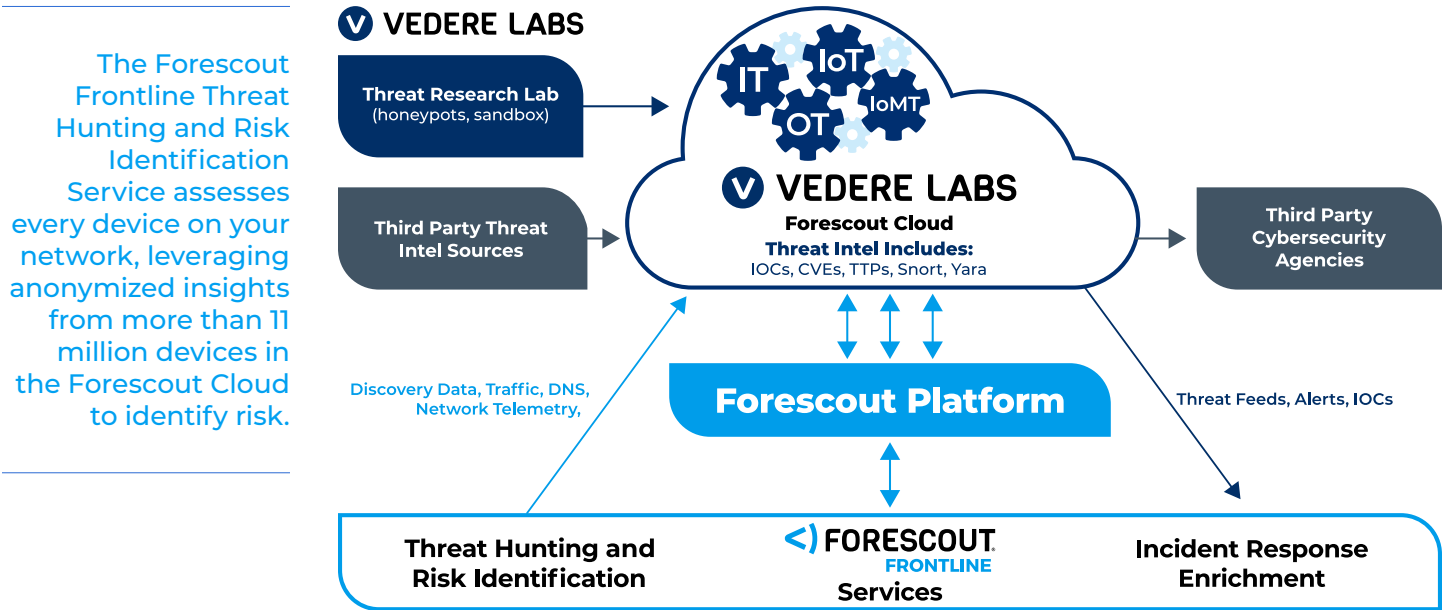

### Actionable Risk Intelligence

Most organizations use multiple security tools, often across multiple teams, to help identify threats and other forms of risk, but their insights are limited to siloed views of IT, IoT, IoMT or OT assets. Typically, multiple device types exist throughout your extended network and the environments are often interconnected, which means cybersecurity risk must be identified and tackled holistically.

The Forescout Frontline Threat Hunting and Risk Identification Service provides the comprehensive insight you're missing. A dedicated team will hunt for and reveal a wide range of threats and other areas of risk across all your network environments in a non-intrusive manner. The results will be documented in a detailed report that includes:

- ▶ The threat-hunting approach used for your organization, including scope and targeted threats
- ▶ Contextual information about each discovery, including:
  - » Type of threat or vulnerability and associated risk
  - » Number and profile of all impacted devices
  - » Network location where threats and other areas of risk exist
- ▶ Mitigation and remediation options

**At the end of the engagement, you'll have the right information to create an actionable plan for efficiently and effectively addressing each area of risk covered in the report.**

## Reveal, Report, Review

Achieve a baseline of your organization-wide threat landscape across all networks and device types. Email [frontline@forescout.com](mailto:frontline@forescout.com) to book your complimentary Threat Hunting and Risk Identification Service\*
