ForeScout Product Licensing Policy

Product	Licensing Policy
ForeScout CounterACT®	Each ForeScout CounterACT appliance includes a license for a specified maximum number of devices[1]. Appliances are available in a range of sizes from 100 devices[1] to 10,000 devices[1] (please refer to the product data sheet for the number of devices licensed with each appliance).
All ForeScout Extended Modules, except those for VMware AirWatch, IBM MaaS360 MDM, MobileIron and Citrix XenMobile **Advanced Threat Detection Integration Module** **ePO Integration Module** **Open Integration Module** **SIEM Integration Module** **Vulnerability Assessment Integration Module** **Splunk Integration Module**	Each extended module is licensed for a specified number of devices[1]. A module needs to be licensed for the total number of devices[1] that are managed by CounterACT or, if the module license is being applied to a CounterACT Enterprise Manager, the module needs to be licensed for the total number of devices[1] that are managed by the CounterACT Enterprise Manager. Each extended module license is designed to be installed on an individual CounterACT appliance or CounterACT Enterprise Manager appliance. If a network has multiple CounterACT Enterprise Manager appliances, or multiple CounterACT appliances without a CounterACT Enterprise Manager, then module licenses should be purchased separately for each CounterACT Enterprise Manager, or each CounterACT appliance without a CounterACT Enterprise Manager. The size of each module license should cover the number of devices[1] managed by each CounterACT Enterprise Manager or each CounterACT appliance.
ForeScout Extended Modules for Enterprise Mobility Management (EMM) products – VMware AirWatch, IBM MaaS360 MDM, MobileIron and Citrix XenMobile **MDM Integration Module**	Each EMM extended module is licensed for a specified number of mobile devices. An EMM module needs to be licensed for the total number of mobile devices that are managed by an EMM system and which appear in the CounterACT inventory. Each EMM extended module license is designed to be installed on an individual CounterACT appliance or CounterACT Enterprise Manager appliance. If a network has multiple CounterACT Enterprise Manager appliances, or multiple CounterACT appliances without a CounterACT Enterprise Manager, then module licenses should be purchased separately for each CounterACT Enterprise Manager, or each CounterACT appliance without a CounterACT Enterprise Manager. The size of each module license should cover the number of mobile devices managed by each CounterACT Enterprise Manager or each CounterACT appliance.
ForeScout CounterACT Enterprise Manager	Each ForeScout CounterACT Enterprise Manager appliance includes a license to manage a specified number of CounterACT appliances. CounterACT Enterprise Managers are available in a range of sizes that include licenses for 5, 10, 25, 50, 100, 150, and 200 CounterACT appliances. Both physical and virtual CounterACT appliances are included in the license count.

[1]The device count is the maximum number of devices known to CounterACT by either their MAC address and/or their IP address. Devices may be detected by CounterACT when on-site or off-site, or they may be made known to CounterACT via third-party integrations. A device may be counted more than once if it uses multiple IP addresses and/or multiple MAC addresses. Devices include user endpoints (such as laptops, tablets and smartphones), network infrastructure devices (such as switches, routers and access points), non-user devices (such as printers, IP phones, security equipment, medical devices, manufacturing equipment) and virtual machines. Device information is retained in CounterACT from initial discovery until such time the information is purged, based on aging preferences set in CounterACT.

End-of-Life Products

Product	Licensing Policy
CounterACT Edge *End-of-Sale: June 30, 2016*	Each ForeScout CounterACT Edge appliance includes a license for a specified amount of network bandwidth. Appliances are available in a range of sizes from 2 Mbps to 1 Gpbs.
CounterACT Edge Enterprise Manager *End-of-Sale: June 30, 2016*	Each ForeScout CounterACT Edge Enterprise Manager appliance includes a license to manage a specified number of CounterACT Edge appliances. CounterACT Edge Enterprise Managers are available in a range of sizes that include licenses for 5, 20, and 50 CounterACT Edge appliances.
Integration Module Bundle V1 *End-of-Sale: June 30, 2016*	Integration Module Bundle V1 includes licenses for each of the modules included within the bundle. The licensing policy for each module is enforced separately as described on this page.
