FORESCOUT®

NETWORK SECURITY:
ZERO TRUST ASSURANCE
Unlock the full potential of your network's security.

Zero Trust Assurance delivers an adaptive approach for constructing and reinforcing network resilience against unauthorized access and lateral threats with real-time insight and oversight for all connected devices. Achieve assurance with automated policy enforcement, advanced segmentation, and integration into the cybersecurity ecosystem — so you can swiftly respond to and recover from incidents.

KEY BENEFITS:

▶ Secure and comprehensive visibility, insight and assessment into all connected devices ensuring that they can be monitored, managed and controlled in compliance with internal policies, external standards and industry regulation.

▶ Automation of device compliance procedures and policy enforcement, streamlining security management.

▶ Rapid configurable response to security incidents helping to minimize potential damage and downtime.

▶ Seamless integration with existing security infrastructure and network workflows to enhance operational efficiency and investments while improving interoperability and strengthening security measures.

▶ Extend visibility into network traffic flows to segment, mitigate risk and demonstrate compliance.

▶ Manage segmentation policies through a single policy layer which extends across the entire environment.

▶ Build and visualize zero trust policies for creating context-aware segmentation policies for segmentation policy design and validation.

▶ Flexible deployment options.

▶ Premium Support optimizes the solution with technical help, upgrade services, regular health checks, configuration and policy tuning, access to E-Learning and more for continuous platform enhancement.

USE CASES:

▸ ASSET DISCOVERY & CLASSIFICATION OF MANAGED AND UNMANAGED ASSETS

▸ AUTOMATED COMPLIANCE ASSESSMENT

▸ ASSET REMEDIATION

▸ RISK MITIGATION

▸ MODERN NETWORK ACCESS CONTROL

▸ SECURITY AUTOMATION

▸ THREAT CONTAINMENT

▸ DYNAMIC NETWORK SEGMENTATION

▸ TRAFFIC VISUALIZATION & ANALYSIS

▸ ZERO TRUST ARCHITECTURE DESIGN

NETWORK SECURITY - ZERO TRUST ASSURANCE INCLUDES:

Products / Services	Included
eyeSight – Asset discovery, classification, and assessment	✔
eyeControl – Modern network access control	✔
eyeRecover – Service continuity and resiliency	✔
eyeExtend Connect - Create and deploy eyeExtend applications	✔
eyeSegment - Network segmentation and traffic visualization	✔
eyeExtend module of choice	One module
Premium Support – Ongoing optimization and health maintenance services	✔
Gold or Diamond Support Services – Proactively drive advanced solution optimization	Elective add-on
Adoption Support Services – Onboard and maximize solution adoption and ROI	Elective add-on
Threat Detection & Response – SOC productivity and efficiency	Elective add-on
